

سم الله الرحمان الرحيم وبه نستين إنه خير ناصر ومعين الحمد لله رب العالين وصلى الله على حسّد و علي و آلهما الطّبين الطّعرين ولعنه الله على أعدائهم أجمعين أبدا لآبدين In the name of Allah the Compassionate and the Merciful. We asking help to Allah: verily He is the best Helper. Praise Allah, the Lord of the worlds. May Allah pray on Mohammad, Eali and their family the virtuous, the pures and Callah be with their enemies forever and ever. **Allah the High, the Immense in His sage and high Book said:** (He is the) Cleaver of the daybreak. He has appointed the night for resting, and the sun and the moon for reckoning. Such is the measuring of the All-Kinowing. **The mean solar time of the calendars of the Ĥayāt-aĕlā Foundation is Mean Time KMT, Kaĕbah - Makkah**

THE ANNUAL LETTER OF THE CONCISE LUNAR CALENDAR

Lunar and solar islamic hijri calendars, Nativities of Moĥammad ﷺ and Jesus ﷺ, the Eskandarian calendar, Year counting from the creation of Ãdam ﷺ and the era of Mawlā Śāĥeb al-amr ﷺ.

For determining the beginning of the lunar month, Moonlight Nights, Moon in sidereal Scorpio sign, inauspicious times and days (for material and worldly affairs) and Interlunar days.

The month of Ramadān 1439-1440 lunar hijri 1397-98 solar hijri = 2018-19 Jesus Nativity بالله 12543 Creation of Ādam بالله 1492-93 Moĥammad nativity 1179- 80 the era of Šāĥebal-amr بالله

> Research project, management and scientific peers: Dãr al-Maĕãref al-Elãhiyyah

Preparation and compilation: The Institute of astronomy, astrology and calendar of Ĥayãt -aĕlã Foundation

The manual of the Concise lunar calendar

1- This calendar presents: Lunar and Solar islamic hijri calendars, Year counting from the Nativity of Moĥammad and the Nativity of Jesus , Year counting from the creation of Ãdam and the Era of Ĥadrat Mawlā Ŝãĥeb al-Amr

2- According to the Šariaĕ, the criterion which determines the first day of the lunar month is the collective observation of the Helãl. The opinion of the majority of the Muslim jurists, of all branches of Ëslãm, is that; the astronomical calculation is not equivalent to the observation of the Helãl with naked eye. Therefore the method of calculation can not be used as a legal argument.

In the Speech of the Custodians of the Revelation when an impediment about the collective observation of the Helãl happens or there is controverse about it, there is a rule which has been transmitted to remove every confusions. In this calendar, for determining the beginning of the lunar month, we referred to this rule transmitted from the Infallibles

3- As this calendar is concise, it presents the most essential dates such as: the beginning of the lunar month, Moonlight Nights, Moon in sidereal Scorpio sign, inauspicious times, interlunar days, lunar and solar eclipses.

4- To become familiar with the terms of this calendar and also with their scientific and religious basis, refer to the weekly " Rãhe Ãsemãn" presented in the next page.

Prerequisites for using the Concise lunar calendar

If you are not yet familiar with the ancient and islamic calendar of astronomy and astrology, for better use of **the Concise lunar Calendar**, first carefully study the following numbers of the educational weekly *Rãhe Ãsemãn*.

For a general introduction about astronomical calendars of Ĥayãt-aĕlã Foundation:

Rãhe Ãsemãn n°49: The general manual of the Astronomical Calendars of Ĥayãtaĕlã Foundation

Rãhe Ãsemãn n°97: The advenced manual of the Public Ephemeris Calendar

Rãhe Ãsemãn nº145: The manual of the Professional Ephemeris Calendar.

Rãhe Ãsemãn nº47: *KMT mean time: the mean solar time of all the Astronomical Calendars of Ĥayãt-aělã Foundation*

Rãhe Asemãn n°50: Scientific basis of the different astronomical times in the world.

Rãhe Ãsemãn n°52: Tables of Time Zones of Makkah Mean Time (KMT).

Rãhe Ãsemãn n°7: Research references of the astronomical calendars and publications of Ĥayãt-aělã Foundation

Rãhe Ãsemãn n°31: Gathering and religious assemblies' schedule

Rãhe Ãsemãn n°3: About astronomy and astrology: those sciences are an inheritance of the prophets of Allâh and their successors.

To download those numbers, refer to the data of **Rãhe Ãsemãn** in the astro web site of $\hat{H}ay\tilde{a}t$ -aėlã Foundation:

http://Aelaa.net/Fa/viewtopic.php?f=52&t=35

Ancient and Islamic Astro Center of Ĥayāt-aĕlā Foundation http://aelaa.net/EN/Nojum.aspx

The general manual of the calendars of Ĥayãt-aĕlã Foundation

1. The master calendar of the publications.

2. Explications about the various years counting.

The years counting from the Creation of \tilde{A} dam \mathfrak{A} : This is the calendar of the Mankind which has the oldest starting and it is also the longest calendar existing since the creation of the father of humanity, Hadrat \tilde{A} dam \mathfrak{A} . So, the mention of this calendar has an historical value for us as children of \tilde{A} dam \mathfrak{A} and it is particularly appropriate as a divine calendar.

Although, the time that separates us from $\hat{H}adrat \tilde{A}dam_{\underline{W}}$ is so long and the reviews about his lifetime are numerous, so, for the beginning of this calendar, we have used the most ancient date mentioned in the Discourse of the Custodians of the Revelation \underline{W} that has been quoted from Sayyed ebn Tawõs¹ from the writting of the Prophet Idris (Enoch) \underline{W} :

Between the beginning of the creation and the mixing of the sludges ("tinat") of $\hat{H}adrat \tilde{A}dam \tilde{S}afi-o-llah$ and the moment when Allah breathed the soul into $\tilde{A}dam$, 120 years have elapsed. After this, according to a rewayat reported by Fadl ebn Šazan (follower of four Emams; from the eighth to the eleventh Emam), between the moment when Allah breathed the soul into $\tilde{A}dam$ until his death, 1030 years have elapsed. And between the death of $\hat{H}adrat \tilde{A}dam$ and the birth of $\hat{H}adrat Mohammad$, 9900 years have passed.²

¹ The book saĕd al-soĕõd, Sayyed ebn Tāwõs p.37,quoted from Beĥār al-Anwār Vol.11, p.269 .

 $^{^2\,}$ The books of Al-Fadãåel, Fadl ebn Šãžãn p.24, quoted from Beĥãr al-Anwãr Vol.15, p.288 .

So we obtain: 120 + 1030 + 9900 + 53 + 1440 = 12543 years.

Since the beginning of the new year, according to the School of the Revelation, for the followers of the Truth, is the blessed month of Ramadãn, the starting point of these calculations is this blessed month.

Noting: 1) According to the modern scientists, the early history of the Homo sapiens doesn't go back further than the aforementioned date 2) The creation of $\hat{H}adrat \tilde{A}dam$ and his descendants, who are the Homo sapiens, should not be confuse with the other human races who were living before $\hat{H}adrat \tilde{A}dam$ and became extinct. Those Apes (Hominoidea) had neither the intellectual capacities nor the reason of the Homo sapiens.

The years counting from the Nativity of Ĥadrat Moĥammad

Hijri date + 53 (the age of the Prophet $\underset{\text{Max}}{\underset{\text{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}{\underset{max}}}{\underset{max}}{\underset{max}}}{\underset{ma$

One of the disappointing things of the Arab countries is that their governments had established as official calendar, the calendar of the Nativity of Jesus and, while the population of their countries is Muslim. It is one of the reason why the Ĥayāt-aĕlā Foundation choice to use the hijri calendar as basis of its publications to raise the awareness of the people of faith and because of the importance of the Nativity of the Holy Prophet and the Arab governments become aware and don't use the calendar of the Nativity of Jesus any more, and if they want to use this calendar, use it, but not as the official calendar of their contry. And if they want to use a solar calendar, they can use the Islamic solar calendar.

The years counting of the Expectation: the date of the Era of Ĥadrat Ëmãm-zzaman $\underline{\otimes}_{\mathbb{R}}$: Since the face of Allãh for the followers of the Truth, is Ĥadrat Mawlā Sâĥeb al-amr $\underline{\otimes}_{\mathbb{R}}$, and since we are in the era of this Ëmãm and at the end of the times, to preserve this value and ongoing attention to this huge divin order, this calendar starts with the beginning of the Ëmãmat of Ĥadrat (260 hijri) that's mean: 1439 (the actual date of hijri) – 260 = 1179 years of the era of Ëmãm Mahdi $\underline{\otimes}_{\mathbb{R}}$

3. The beginning of the year.

Traditionally, in the opinion of the commun people and the Arabs, the new lunar year begins with the month of Moĥarram al-ĥarãm.

But in the Discourse of the Custodians of the Revelation and for the followers of the Truth, the first month of the year is the blessed month of Ramadãn and since the basis of the calendars of the Foundation is the Discourse of the Custodians of the Revelation and the Holy Infallibles we give the preference to the divine guidance of the Treasure of the Custodians of the Revelation we over the commun practices. This subject have been described in details in others publications of Hayāt-aĕlā Foundation.

4. The mean solar time of the calendar is KMT.

The center of the Earth is **the Kaĕbah** and **Makkah Mukarramah**. Therefore, we have choice as prime meridian, the meridian which crosses Makkah and the mean solar time of all the astronomical calendars of **Ĥayãt-aĕlã Foundation** is **the Kaĕbah** mean time (KMT). The time zones of every contries have been established according to this mean time.

The geographical coordinates description of the countries and the different time zones relative to **Kaĕbah** has been exposed in the 52^{nd} number of the weekly Rãhe Ãsemãn, but a concise table describing the different time zones has been presented in this calendar. In this table the increasing time difference has been mentioned by the sign (+) and decreasing time difference by the sign (-).

For example: If we need to determining the hour of an astronomical event in Iran (like when a planet entering in one of the signs of the Zodiac), since the time difference between Iran and Makkah is an half hour and since Iran is situated to the east of Makkah, we will add 30 minutes to the schedule of the calendar to obtain the local hour of the astronomical event.

But about the rise of the stars, it is different: since countries have not the same latitude and longitude, the concise table time zones can not help us to known the local time of the rise of the stars. Therefore, in the last column of the table time zones published in Rãhe Ãsemãn n°52, we have mentioned the rise of Aš-šaratãn star (which marks the beginning of the Arab solar calendar) relative to Makkah for every countries.

The geographical coordinates of all the countries have been extracted from satellite pictures used for military precise purposes: today, those satellite pictures are considered as the most precise references for geographical coordinates.

5. The hours of the calendar.

The calendar uses the system time of 24-hour clock starting at midnight (00:00). Those hours countdown is accurately and concisely using the numbers from zero to twenty-four.

6. Daylight Saving Time (Summer Time).

Typically clock is adjusted forward one hour, or two hour, in spring or other season. In autumn, generally, it return to current time. This hour change is not the

same in all the countries and there is some countries which do not apply this system. So, in the calendars of Ĥayāt-aĕlā Fondation, the daylight saving time has not been considered, that's mean that the hours mentioned are in Real time, without daylight saving time.

Thus, according to the season, users must add to the hours mentioned in the calendars, the daylight saving time of the zone they want.

For example, about Iran: the time difference is + 30 minutes. In early spring until the end of the summer, due to daylight saving time (+ 1 hour), the time difference between Makkah and Iran is one hour and an half. Then, it is necessary to add one hour and half to the hours mentioned in the calendar for getting the Iranian summer local time: (KMT+1h30).

7. The criteria for determining the astronomical twilight (faĵr), Sunrise and Sunset times.

The criteria for determining the time of the astronomical twilight (faĵr) is sensory and šarĕi. Astronomical twilight happens when the Sun reaches 18 degrees below the horizon (in regions of moderate altitude). The schedules of astronomical twilight of the calendars of the Foundation have been extracted from the Naval Observatory of U.S. Navy which is an international reference and the most accurate astronomical center of the world.

The criteria for determining the time of **Sunrise** and **Sunset**, is the upper periphery of the solar disk with the correction calculation of light refraction, and the most accurate method to determine precisely this moment is the visual perception and the observation.

8. The sequence of nights and days in the calendar.

According to the Quran, the teachings of the School of the Revelation and the Islamic culture, the night precedes the day. Over the course of history, at the start of writing and subsequently, this order was the method of the lunar calendars; Persian, Arabic and most of the calendars of Orient.

The night preceding day, begins with Sunset and ends with Sunrise.

The day following night, starts with Sunrise and ends with Sunset.

Therefore, the new date of the calendar begins with Sunset (mağreb) and not at midnight or at Sunrise.

For believers, according to this system, the night of Friday precedes the day of Friday. So, they don't recite the doĕã Kõmeyl in the night following the day of Friday but in the night before the morning of Friday and following the day of

Thursday. The day of Friday begins at Sunrise and continues until Sunset and at Sunset, Saturday night begins.

In this type of calendar and according to this method, the date always changes at Sunset.

This detailed explanation is to correct the western habit which consists in preceding day to night. During these last years, due to the intrusion of colonial culture in most of Islamic countries, this system became the custom of those countries. So the people think that, the night of Friday is the continuation of the day of Friday.

In farsi, to avoid misunderstandings between night of Saturday and night of Friday, they say "the night of Friday" for the night before the day of Friday and "Friday night" for the night after the day of Friday.

In western calendar, Friday starts at midnight and continues until midnight of the following night. So, the night is divided into two halves; the first half of the night belongs to the day before and the second half to the day after. That is to say, the half before Friday midnight is considered as a part of Thursday and the half after midnight is considered as a part of Friday. In western calendar, the date changes at midnight. This system is contrary to the teachings of the School of the Revelation and contrary to the religious values and methods of the ancient calendars established by the divine prophets we

In the astronomical calendars of Ĥayāt-aĕlã Foundation when it says, for example, that the Moon is entering into the sidereal sign of Aries on Sunday 9th Rabiĕ Al-Awwal, at 19:41, it means: at 19:41, in the night of Sunday before Sunday morning, the Moon is entering into the sidereal sign of Aries.

Also, when it is mentioned that the Moon is entering in conjuction with Al-Eklil mansion on Tuesday at 0:55, it means 55 minutes after midnight, in the night of Tuesday after Monday's Sunset (and not the night after the day of Tuesday).

9. Our reference for determine the times of the astronomical events.

In astronomy and astrology, the celestial events are studied according two coordinate systems: one is based on the observation of the celestial events from the surface of the Earth (topocentric system) and the second is based on a coordinate system whose origin is the center of the Earth (geocentric system).

Using the topocentric system, that's mean make a separate calculation and extract a calendar for every points on the surface of the Earth. It is for this reason that the geocentric method has been established; to avoid this complexity and allow the uniqueness of the calendar of the celestial events for all the planete.

In the calendars of Ĥayāt-aĕlā Foundation, celestial events have been mentioned according the geocentric system.

10. The astronomical sources of the calendars of the Foundation.

In the domaine of religious knowledges and astronomy and astrology for the extraction of the calendars, dates, time zones, lunar and solar eclipses and astrological elections, the Foundation Ĥayãt-aĕlã uses the oldest books of references in astronomy, astrology and also the most recent scientific discoveries and researchs.

All the astronomical data of this calendar (the position of the Moon, the Sun and other planets and stars) have been extracted from the calculations and the tables published by the experts of the NASA and the Swiss ephemeris published by Astrodienst.

For more information about the bibliography of $\hat{H}ay\tilde{a}t$ - $a\tilde{e}l\tilde{a}$ Foundation, refer to the weekly Rãhe Asemãn n°7 in the Ancient and Islamic Astro web site of the Foundation :

http://www.aelaa.net/En/Nojum.aspx

World Time Zones and Makkah Mean Time

★ The center of the Earth is **the Kaĕbah** and **Makkah Mukarramah**. So, we have choice as prime meridian, the meridian which cross Makkah Mukkarramah and the time zones have been established relative to the Kaĕbah. All the astronomical calendars of Ĥayāt-aĕlã Foundation use this mean solar time.

• The time zones has been presented in the following table. The time difference increasing are mentioned with the sign (+) and decreasing time difference with the sign (-). By adding or subtracting to the local time of Makkah the time offset mentioned, we obtain the local time of the country wanted.

◆ **Daylight saving time (DST):** Typically clocks are adjusted forward one hour, or more, in spring or an other season. But daylight saving time is not the same in all the contries and several contries don't use it. So, daylight saving time in the time zones table is not in effect.

For example: in Iran the difference time with Makkah is an half hour but, from the beginning of spring to the end of the summer, because of the daylight saving time (which is one hour), we should add one hour and an half to the hours mentionned in the calendars to obtain the local summer time of Iran.

Perform affairs in inauspicious times

Question: In some legal and religious recommendations and also in ancient scientific terms and common beliefs, it exists inauspicious or inappropriate days or times (for the affairs of this world) such as; interlunar days or Moon in sidereal Scorpio sign, or other special days of the month.

If someone doesn't know those times and their negative aspects or knows it but doesn't have the choise to let or change his activities what should he do?

Answer: If someone is not informed about inauspicious times (like Moon in sidereal Scorpio sign that is inauspicious for some wordly affairs) or doesn't have the possibility to known it precisely, the Custodians of the Revelation we have transmitted some very easy recommendations:

Avoidance + spiritual occupations + give alms + fast + prayer + seekingrefuge to All $\tilde{a}h$. Those acts removed adverse effects of inauspicious times and days. For better comprehension about this subject, we quote some hadiths:

1- Šeik Tõsĩ has quoted that Sahl Ebn Yaĕqõb met Ëmãm Askarĩ and after he spoke about elections times and about which times are auspicious or inauspicious, Sahl Ebn Yaĕqõb to Ëmãm asked: Sometimes I have to do a work in inauspicious time, what should I do? Ëmãm said: Due to the blessing of our Welãyat for our šiites, there is a protection that if they travel through the depths of the seas and the deserts among predators and enemies from ĵinns and humans, they will be safe of any worries. So have confident to Allãh the Almighty, and be pur and have sincere consecration to the Welãyat of Immaculate Ëmãms So, wherever you go and for any work you want to do, go and do it and before, the morning of these day, say three times this invocation:

أَصْبَحْتُ اللَّهُمَّ مُعْتَصِماً بِذِمَامِكَ الْمَنِيعِ الَّذِي لَا يُطَاوَلُ وَ لَا يُحَاوَلُ، مِنْ شَرِّ كُلِّ طارِقٍ وَ غَاشِمٍ، مِنْ سَايِرِ مَا خَلَقْتَ وَ مَنْ خَلَقْتَ؛ مِنْ خَلْقِكَ الصَّامِتِ وَ النَّاطِقِ؛ فِي جُنَّةٍ مِنْ كُلِّ مَخُوفٍ بِلِبَاسٍ سَابِغَةٍ حصينةٍ، وَ هِيَ وِلَاءِ أَهْلِ بَيْتِ نَبِيِّكَ مُحمَّدٍ سَنِ ، مُحْتَجِباً مِنْ كُلِّ قَاصِدٍ لي بِأَذَيَّةٍ (× قاصِدٍ إلى أَذِيَّةٍ) بِجدارِ حَصِينِ الْإِخْلَاصِ فِي الإعْتِرَافِ بِحَقِّهِمْ وَ التَّمَسُّكِ بِحَبْلِهِمْ جَمِيعاً، مُوقِناً بِأَنَّ الحُقَّ لَهُمْ وَ مَعَهُمْ وَ فِيهِمْ وَ بِهِمْ، أُوَالِي مَنْ وَالَوْا، وَ أُعادي مَن عادوا، أُجَانِبُ مَنْ جَانَبُوا، فصلَ على محمّد وآل محمّد، وَ أَعِذْنِي اللَّهُمَّ بِهِمْ مِنْ شَرِّ كُلِّ مَا أَتَقِيهِ، يَا عَظِيمُ حَجَزْتُ على محمّد وآل محمّد، وَ أَعِذْنِي اللَّهُمَ بِهِمْ مِنْ شَرِّ كُلِّ مَا أَتَقِيهِ، يَا عَظِيمُ حَجَزْتُ على محمّد وآل محمّد، وَ أَعِذْنِي اللَّهُمَ بِهِمْ مِنْ شَرِّ كُلِّ مَا أَتَقِيهِ، يَا عَظِيمُ حَجَزْتُ متا رَحمين على محمّد وآل محمّد، وَ أَعِذْنِي اللَّهُمَ بِهِمْ مِنْ شَرِ كُلِّ مَا أَتَقِيهِ، يَا عَظِيمُ مَعَان مترا وَ نُعَارَض نِي الْأَعَادِي عَلَيْهُمْ وَ مَعْنِعُهُ مَنْ مَا أَوَا عَنْتُوا، وَ مَنْ عَادَوْنَ أُوا يَقْتَكُ

Asbaĥto allãhomma moĕtaseman beŽemãmekal maniĕ allaži lã yotāwalo wa lã yohãwalo, men šarre kolle tãreqen wa ğãšem, men sãyere mã kalaqta wa man kalaqta; men kalqeka s-sãmete wa nnãteq; fi ĵonnaten men kolle makõfen belebãsen sãbeğaten hasĩnah, wa heya welãae ahle bayte nabiyyeka moĥammaden (x salla-llãho alayhe wa ãleh) moĥtaĵeban men kolle qãseden li beåaŽiyyaten (x qãseden elã aŽĩyyaten) beĵedãre hasĩnel-eklãs fel-eĕterãfe beĥaqqehem wa ttamassoke beĥablehem ĵamiĕã, mõqenan be åannal-ĥaqqa lahom wa maĕahom wa fĩhem wa behem, owâli man wãlaw, wa oĕãdi man ĕãdõ, oĵãnebo man ĵãnabõ, fasalle ĕalã Moĥammad wa ãle Moĥammad, wa aĕeŽniy-allãhomma behem men šarre kolle mã attaqĩh, yã ĕaźīmo ĥaĵazto (x ĕaĵazate) l-åaĕādiya ĕanni bebadĩĕe-ssamãwãte wal-ard, ennã ĵaĕalnã men bayne aydĩhem saddan wa men kalfehem saddan fa åağšaynãhom fa hom lã yobšerõn.

2- After, Ëmam said: "And also say the same prayer three times in the evening (only instead of saying: asbaĥto allãhomma... say: amsaito allãhomma...) then, you will take place in a divin fortress and you will be safe from any negative effets of those times". Then, Ëmam added: "If you want to do something in inauspicious time, before doing it, recite those surahs; Ĥamd, Falaq, Nãs, Tawĥid, Ãyat al-Korsĩ, Qadr and the verses 190 to 194 of surah Ãle Ĕemrãn. After this, recite surah Ãle Ĕemrãn until the end and recite this invocation":

اللَّهُمَّ بِكَ يَصُولُ الصَّائِلُ، وَ بِقُدْرَتِكَ يَطُولُ الطَّائِلُ، وَ لَا حَوْلَ لِكُلِّ ذِي حَوْلٍ إِلَّا بِكَ، وَ لَا قُوَّةً يَمْتَارُهَا (× يَمتازها) ذُو قُوَّةٍ إِلَّا مِنْكَ (× وَ لا قوّة بمثارها ذُو القُوّة إِلَّا مِنكَ)، أَستَلُكَ بِصَفْوَتِكَ مِنْ خَلْقِكَ، وَ خِيَرَتِكَ مِنْ بَرِيَّتِكَ، مُحَمَّدٍ سَلَّ نَبِيِّكَ، وَ عِتْرَتِهِ وَ سُلَالَتِهِ؛ عَلَيْهِ وَ عَلَيْهِمُ السَّلَامُ، صَلِّ عَلَيهِ (× صلّ على محمّد) و عَلَيْهِمْ، وَ اكْفِنِي شَرَّ هَذَا اليوم وَ ضَرَرَهُ (× ضرّه)، وَ ارْزُفْنِي خَيْرُهُ وَ يُمْنَهُ وَ بَرَكَاتهُ، وَ اقْضِ لِي فِي مُتصرَّفَاتِي (× منصرفِ) بِحُسْنِ الْعَاقِبَةِ (× العافية) وَ بُلُوغ الْمَحَبَّةِ وَ الظَّفَرِ بِالأُمْنِيَةِ، وَ كَفَايَةِ الطَّاغِيَةِ الْعُوِيَّةِ (× القوية- المعويّة)، وَ كُلِّ فِي قُدْرَةٍ لِي عَلَى أَذِيَّةٍ، حَتَى أَكُونَ فِي جُنَّةٍ وَ عِصْمَةٍ وَ نِعمَةٍ؛ مِنْ كُلِّ بَلَاءٍ وَ نِقِيمَةٍ، وَ أَبْدِلْنِي فيهُ أَلْعَاقِبَةِ وَ عَمْدَةً وَ عَمْدَةً وَ عَمْرَةً مَنْ الْعَاقِبَةِ (وَ اقْطُفَرِ بِالْأُمْنِيَةِ، وَ كَفَايَةِ الطَّاغِيَةِ الْعُويَةِ (× القوية- المعويّة)، وَ كُلُوغ الْمَحَبَّة وَ عَلَى أَذِيَةٍ، حَتَى أَكُونَ فِي جُنَّةٍ وَ عِصْمَةٍ وَ نِعمَةٍ؛ مِنْ كُلَّ بَلَاءٍ وَ نِقِيمَةٍ، وَ أَبْدِلْنِي فيهِ مِنَ الْمُخَاوِفِ أَمْناً، وَ مِنَ الْعَوَائِقِ فِيهِ يُسْرًا (× برًا)، حَتَى لَا يَصُدَى فَا أَنْدِي فَيهِ الْمُرَاذِ؛ وَ لا يَحُلَي فِي طَارِقٌ مِنْ أَذَى الْعِبَادِ، إِنَّكَ عَلى كُلَّ شَيْءٍ قَدِيرٌ، وَ الْأُمُورُ إِلَيْكَ

Allāhomma beka yašolo ššādel, wa begodrateka yatolo tiādel, wa lā ĥawla lekolle ži ĥawlen ellã bek, wa lã gowwatan yamtãrohã (x yamtãzohã) žõ gowwaten ellã menk (x wa lã qowwatan bemaçãrehã žol-qowwate ellã menk), asåaloka besafwateka men kalqek, wa kiyarateka men bariyyatek, Moĥammaden (x sallallãho alayhi wa ãleh) nabiyyeka wa četratehi wa solãlatehi alayhi wa aleyhimo ssalām, salle ĕalayhi (x salle ĕalā Moĥammad) wa alayhim, wa-kfeni šarra hāžalyawm wa dararahõ (x darrahõ) wa-rzogni kayrahõ wa yomnahõ wa barakãtah, waqde li fi motasarrafăti (x monsarafi) beĥosnel-ĕaqebat (x ĕafiyah) wa bologelmaĥabbate wa-żżafare belåomniyyah, wa kefãyate *itãgiyatel-gawiyyah* (x alqawiyyah, al-mağwiyyah), wa kolle zi qodraten li ĕalã ažiyyah, ĥattã akõna fi ĵonnate w-wa ĕeśmate w-wa neĕmaten men kolle balãe w-wa neqmah, wa abdelni fihe menal-makawefe amna, wa mena-l-eawadeqe fihe yosra (x barra) hatta la yasoddanī sāddon ĕanel morād; wa lā yaĥolla bi tarego m-men ažā-l-ĕebād, ennaka ěalā kolle šayden gadīr, wal-omõro elayka tasīr, yā man laysa kameclehi šayd, wa howa ssamīčol-basīr.

3- It also quoted that: If in inauspicious time you should perform an affair, so, after every Prayer call Allãh with this invocation to be safe from any calamities:

لَا حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أُفَرَّج بِهَا كُلَّ كُرْبَةٍ، لَاحَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَحَلُّ بِهَا كُلَّ عُلْمَةٍ, لَا حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَجْلُو بِهَا كُلَّ طُلْمَةٍ, لَا حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَجْلُو بِهَا كُلَّ طُلْمَةٍ, لَا حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَسْتَعِينُ بِهَا عَلَى كُلِّ شِدَةٍ وَ مُصِيبَةٍ, لَا أَفْتَحُ بِهَا كُلَّ بَابٍ, لَا حَوْلَ وَلَا قُوَّةَ إِلَّا بِاللهِ؛ أَسْتَعِينُ بِهَا عَلَى كُلِّ شِدَةٍ وَ مُصِيبَةٍ, لَا حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَسْتَعِينُ بِهَا عَلَى كُلِّ شِدَةٍ وَ مُصِيبَةٍ, لَا حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَسْتَعِينُ بِهَا عَلَى كُلِّ أَمْرٍ يَنْزِلُ بِي، لَاحَوْلَ وَ لَا قُوَّة إلَّا بِاللهِ؛ أَسْتَوْجِبُ بِهَا الْعَفْوَ و حَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَسْتَعِينُ بِهَا عَلَى كُلِّ أَمْرٍ يَنْزِلُ بِي، لَاحَوْلَ وَ لَا قُوَّة إلَّا بِاللهِ؛ أَسْتَوْجِبُ بِهَا الْعَفْوَ و أَعْتَصِمُ بِهَا مِنْ كُلِّ مَحْدُولٍ أُحَاذِرُهُ, لَاحَوْلَ وَ لَا قُوَّةَ إِلَّا بِاللهِ؛ أَسْتَوْجِبُ بِهَا أَعْدَاءَ اللهُ، وَ غَلَبَتْ حُجَّةُ اللهِ، وَ بَعَى وَجُهُ اللهِ، لَاحَوْلَ وَ لَا قُوَّةَ إِلَا بِاللهِ؛ أَسْتَوْجِ أَسْتَوْجِ بَهَا أَعْدَاء الْعَافِيَةَ وَالرِّضَا مِنَ اللهِ. لَاحَوْلَ وَ لَا قُوَّةَ إِلَا بِاللهِ؛ تُفَرِقُ (× تَفْرُقُ) بِهَا أَعْدَاء اللهُ، وَ غَلَبَتْ حُجَة اللهِ، وَ بَعَى وَبَعَى وَجُهُ اللهِ، لَاحَوْلَ وَ لَا قُوَّةَ إِلَا لِيهِ اللهِ اللهِ اللهِ اللهِ اللهُ أَوْرَاح الْعَانِيَةِ، وَ رَبَّ الْحَلْو اللهِ مُرَبَّ الْعَلَيْ وَ رَبَّ الْعَانِي وَ مَنْ عَلَى مُواللهُ الْعَانِي وَ مَنْ عَلَ وَ رَبَ الْحُولَةُ وَ رَبَةً اللهُ وَ اللهُ مَنْ وَ مَا مَنْ وَ رَبَقُولَ وَ رَبْ وَ رَعْ وَ مَا اللهُ وَ اللهُ وَ مَنْ مَنْ وَ مَا مَ وَ مَنْ وَ مَا مَوْ وَ مَا وَ وَ مَ

It is worth noting that, in other case, and generally for relief to any affair, calling Allāh with this noble invocation can be also benefit enšāå-allāh.

The blessed month of Ramadãn 1439 lunar hijri

Happy New Year for the followers of the Truth

Invocation at the moment of the turn of the year

اللهم بامقلب القلوب والأبصار ثبت قلوبنا وأبصار ناعلى ديبك اللهم بامصرف القلوب صرّف قلوبنا الى طاعمك ونوّر أبصار نابالقرآن

ويامحول الحول والأحوال حول حالنا إلى أحسن الحال

Allāhomma yā moqallebal-qolõbe wal-ābšār çabbet qolõbanā wa absāranā ĕalā dīnek. Allāhomma yā mošarrefal-qolõb, šarref qolõbanā alā ṫāĕatek wa nawwer ābšāranā bel-qorān, wa yā moĥawwela-lĥawle wal-aĥwāl ĥawwel ĥālanā elā aĥsanel-ĥāl

O Allāh, the one who changing the hearts and the discernments, keep our hearts and discernments for your religion.
O Allāh, the one who making the hearts attentive, make our hearts attentive to your obedience and our discernment illuminated by the Qurān.
O Allāh, the one who changes situations and circumstances, change our circumstance to the best of circumstances.

Rites and rituals for the Lunar New Year

1-In the Discourse of Custodians of the Revelation $\underset{\text{month}}{\underset{month}}{\underset{mont}}{\underset{month}}{\underset{mont}}{\underset{mont}}{\underset{mont}}{\underset{mont}}{\underset{mont}}{\underset{$

To get more details about this topic, refer to the weekly **Rãhe Ãsemãn n°1**: <u>http://www.aelaa.net/Fa/viewtopic.php?f=52&t=35#p1084</u>

2- The last day of the month of Šaĕbãn, at sunset and when the night is beginning, the lunar new year is starting. So, the first night of the blessed month of Ramadãn precedes its first day.

3- In the School of the Revelation, for starting the New Year, there is specific acts of worship to ensure that the year will start in obedience and adoration.

4- This spiritual beginning allows that the followers of the Truth begin the New Year in success, enšãå-allãh, and benefit from a better protection against mistakes and calamities in the new year.

5- The acts of worship for beginning the lunar new year have been published independently in the book:

The rites and rituals for the beginning and the end of the Lunar Year (in persan).

2- The last day of the month of Šaĕbãn, at sunset, the lunar year is ending. So, the last night of the month of Šaĕbãn precedes its last day.

3- For the end of the year, in the School of the Revelation, there is specific acts of worship to ensure that the year will end in obedience and adoration.

4- This spiritual end, invites the believer to an internalization and examination of his soul. This act allows that the believer benefit from a better protection against mistakes and calamities, enšãå-allãh.

5- Those acts of worship have been published independently in the book *The rites and rituals for the beginning and the end of the Lunar Year (in persan).* Please click on the following link to download it:

All the astro publications of the Ĥayãt-aĕlã Foundation can be download in website of the Foundation:

Ĥayāt-aĕlā Foundation

<u>www.Aelaa.net</u> Ancient and Islamic Astro Center of Ĥayāt-aĕlā Foundation. <u>http://aelaa.net/En/Nojum.aspx</u>

Astro publications of the Institute of astronomy and astrology of $\hat{H}ay\tilde{a}t$ -aĕlã Foundation, is not limited to the above publications and with the grace and the help of Mawlã and astronomical and astrological calendars will be developed and published, enšãå-allãh.

Astronomers online of Ĥayãt-aĕlã Foundation

Some of the astronomical calculations such as religious times or the planetary hours according to the local times need to extract a special calendar for every time zones. Due to the accuracy of astronomical calendars of Ĥayãt-aělã Foundation, requests of astronomical, scientific and religious Centers around the world, for extracting calendars tailored to their area to use them in publications and software, became increasingly numerous. For providing to this requests and also demands of the privates, we have developed an automated system online so that anyone anywhere, with using internet can be able to access in a few minutes to the different kinds of calendars. This system has been put into service for the most of our publications and others are in progress. To consult and download the calendars of the list below, refer to website of the Centre of islamic and ancient astro of Ĥayãt-aělã Foundation.

1- Religious times Astronomer: This astronomer emits a permanent calendar for the ten ritual times, for all the points of the Earth (mid and high geographic latitudes and polar regions) in the calendar of your choise (lunar, solar or jesusian). Explanations about the basis of the calendar are available in Farsi, English and French. In Farsi = http://aelaa.net/Fa/Awgaat1.htm

In English = <u>http://aelaa.net/En/Awgaat.htm</u> In French = <u>http://aelaa.net/Fr/Awgaat.htm</u>

2- Universal calendar Astronomer: Lunar hijri calendar, the Moĥammad's nativity \Box calendar, Year counting from the creation of \tilde{A} dam $\underset{\mathfrak{M}}{\mathfrak{M}}$, the calendar of era of Sãheb al-amr $\underset{\mathfrak{M}}{\mathfrak{M}}$, the Iranian and Afghan calendar, the Islamic and solar calendar, the ancient Persian calendar, the Jesus $\underset{\mathfrak{M}}{\mathfrak{M}}$ calendar , the Julian calendar, the Žolqarnayn calendar $\underset{\mathfrak{M}}{\mathfrak{M}}$ (rumi calendar), the Hebrew, Indian, Mayan calendar, ISO-8601, Julian Day, Modified Julian Day, Unix and Excel.

http://aelaa.net/Fa/TagwimJahaani.aspx

3- Determination of the qiblah: This program determines precisely the direction of the qiblah for the localities of your choice on satellite image and according to the calculations of spherical trigonometry. Available in eight languages:

```
in Farsi = <u>http://aelaa.net/Fa/Qeble.htm</u>
in Arabic = <u>http://aelaa.net/Ar/Qeble.htm</u>
```

```
in Urdu = <u>http://aelaa.net/Ur/Qeble.htm</u>
```

```
in English = <u>http://aelaa.net/En/Qeble.htm</u>
```

```
in French = <u>http://aelaa.net/Fr/Qeble.htm</u>
```

```
in Spanish = <u>http://aelaa.net/Es/Qeble.htm</u>
```

```
in Turkish = <u>http://aelaa.net/Tr/Qeble.htm</u>
```

```
in Albanian = <u>http://aelaa.net/Sq/Qeble.htm</u>
```

4- Planetary hours Astronomer: *This astronomer gives the hours of the seven planets for the locality of your choice and also in the calendar of your choice (lunar, solar or jesusian) with explanations about the characteristics of the planetary hours.*

Available in Farsi, English and French.

In Farsi = <u>http://aelaa.net/Fa/Saaeat-Kawaakeb.htm</u>

In English = <u>http://aelaa.net/Fa/Ersaal/3/Calendar/EN/Plantary_hours.htm</u> In French = <u>http://aelaa.net/Fa/Ersaal/3/Calendar/FR/Heures_plan%C3%A9taires.htm</u> 5- The lunar concise calendar Astronomer: This astronomer gives "the lunar concise calendar" for the year of your choice, past or future. Available in Farsi, Arabic, English and French. In Farsi = <u>http://aelaa.net/Fa/TaqwimFeshorde.aspx</u> In Arabic = <u>http://aelaa.net/Fa/TaqwimBasit.aspx</u> In English = <u>http://aelaa.net/Fa/Ersaal/3/Calendar/EN/concise calendar.aspx</u> In French = <u>http://aelaa.net/Fa/Ersaal/3/Calendar/FR/calendrier concis.aspx</u>

6- Solar calendar astronomer of lunar observation: Illustration of the phases of the Moon for each day of the lunar months. Annual publication.
In Farsi = <u>http://aelaa.net/Fa/Ersaal/3/Rasadi/TaqwimQamari.htm</u>
In English = <u>http://aelaa.net/Fa/Ersaal/3/Calendar/EN/Lunar_calendar.html</u>
In French = http://aelaa.net/Fa/Ersaal/3/Calendar/FR/Astronome_observation_lunaire.htm

7- The Public Ephemeris Calendar Astronomer: This astronomer gives "the public ephemeris calendar" for the year of your choice, past or future. Available in Farsi, Arabic, English and French. In Farsi = http://www.aelaa.net/Fa/TaqwimHamegaani.aspx In Arabic = http://www.aelaa.net/Fa/TaqwimFalakiAaam.aspx In English = http://www.aelaa.net/EN/public%20ephemeris.aspx In French= http://aelaa.net/FR/éphémérides%20publiques.aspx

8- The Professional Ephemeris Calendar Astronomer: This astronomer gives "the professional ephemeris calendar" for the year of your choice, past or future. Available in Farsi. In Farsi = http://aelaa.net/Fa/TaqwimTakhasosi.aspx

9- The Astrological elections Astronomer: *This astronomer gives "the annual letter of the astrological elections" for the year of your choice, past or future. Will soon be available in Farsi.*

10- The beginning of the lunar months Astronomer: This astronomer determines the first day of the lunar months with notes and diagrams about the Helãl fot the year of your choice past or future. Available in Farsi.

11- Astronomer of the hours of answered prayers: the Caph star (Beta Cassiopeiae / al Kaff al-Kadib). Annual calendar about the position of " the star of the fulfillment of the prayers" (the Caph star in the Cassiopeia constellation) when transits. Will soon be available in Farsi

12- Lunar and Solar eclipses times Astronomer: This astronomer determines the dates of lunar and solareclipses, the time of the beginning, the middle end the end of the eclipsefor all the countries concerned. Also it mentions what kind of eclipse is and mentions the time of the signs Prayer. Will soon be available in Farsi
