All the praises and thanks be to Allāh, the Lord of the Worlds

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ وَبِهِ نَسْتَعِينُ إِلَهُ خَيْرُنَا صِرْ وَمَعِينُ الْحَمْدُ لِلَّهِ رَبِّ الْعَالَمِينَ وَصَلَّى اللَّهُ عَلَى مُحَمَّدٍ وَعَلَى آلِهِ الطَّيِّبِينَ الطَّاهِرِينَ وَلَعْنَةُ اللَّهِ عَلَى أَعْدَائِهِمْ أَجْمَعِينَ أَبَدَ الْأَبَدِينَ

In the name of Allah the Compassionate and the Merciful. We asking help to Allah: verily He is the best Helper. Praise Allah, the Lord of the worlds. May Allah pray on Mohammad, Eali and their family the virtuous, the pures and curse of Allah be with their enemies forever and ever.

Allah the High, the Immense in His sage and high Book said: قَالِقُ الْأَصْبَاحِ وَجَعَلَ اللَّيْلَ سَكَنًا وَالشَّمْسُ وَالْقَمَرُ حُسْبَانًا

Cleaver of the daybreak. He has appointed the night for resting, and the sun and the moon for reckoning. Such is the measuring of the All-Mighty, the All-Knowing.

The annular Solar eclipse 28th of Žĩ-Qaědah 1437

Date of the eclipse according Mean Time KMT, Kaěbah-Makkah:

Thursday 28th Žĩ-Qaědah 1437= 11th Virgo=11th Šahriwar 1395=1st Sept. 2016.

Location: Atlantic Ocean and African continent, South of the Arabian Peninsula (Hijaz and Yemen), the Pacific Ocean, Antarctica, South Pole, Western Indonesia and close to the western coast of Australia.

Eclipse path:

The September 1st eclipse is Member 39 of 71 of saros 135.

The eclipse will start from Atlantic Ocean in the East of America at 09:13:08 KMT and will continue its path crossing the Atlantic Ocean and Africa, will end near the coast of Western Australia at 15:00:40 KMT. The maximum eclipse will occur at 12:08:02 KMT in the Eastern Africawith a magnitude of 0.9706.

About the map of the eclipse path:

The area determined by a pink line on the left side of the map, shows the area where the eclipse will begin.

The area determined by a pink line on the rightside of the map, shows the areas where the eclipse will end.

In the area determined by a pink line on the left side of the map, the solar eclipse will begin at the end of the night.

The area determined by a pink line, on the extreme left side of the map without blue line, designates the zone where the eclipse will be visible at sunrise. In this area, the eclipse will begin from the mid eclipse.

The area determined by a pink line on the left side of the map with blue lines, designates the mid eclipse and the phases of the eclipse after sunrise.

In the area determined by a pink line on the right side of the map, the night will begin before the end of the eclipse, so, the end phases of the eclipse will not be observed.

The area determined by a pink line on the extreme right side of the map with blue lines, designates the area of the mid eclipse and the phases after it, that will happen before sunset.

The area determined by a pink line on the right side of the map with blue lines, designates the mid eclipse and the phases after it, which will happen after sunset. In this area, it will be only in the late afternoon, before sunset, that the beginning of the eclipse will be visible. In this area, nor mid eclipse nor the end of the eclipse will not be observed.

Outside of this zone, in areas determined by blue lines, all the phases of the eclipse will be observed.

The red line shows the maximum eclipse zone with 99.7 kilometers wide.

Perform signs prayer

The beginning of the time of signs prayer is the beginning of the eclipse. It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse. The time of signs prayer terminates with the end of the eclipse.

In the table below those times have been listed. The obligation of signs prayer is starting with the beginning of the eclipse. In the table, the hours of the beginning of the eclipse have been mentioned in the first column. As, it is not appropriate to delay the signs prayer after the middle of the eclipse (when the eclipse reaches its full development), the hours of the mid-eclipse have been mentioned in the second column. In this column, when no hour has been mentioned, it means that in this city, the eclipse will happen after the second half of the eclipse: in those areas, the signs prayer must be immediately performed, without delay in any case. The hours of the end of the eclipse have been listed in the last column: the hours mentioned in this column are also the hours of the end of the signs prayer.

Penumbral lunar eclipse

14th Ži-Ĥejjah 1437.

Date of the eclipse:

The night before the day of Saturday 14th Ži-Ĥejjah 1437 = 27th night of Virgo = 27th night of Šahriwar 1395 = 17th night of September 2016.

Location: This eclipse will be visible from Africa, Europe, Asia and Australia.

The September 28th night eclipse is Member 9 of 71 of saros 147.
Penumbral magnitude: 0.9080

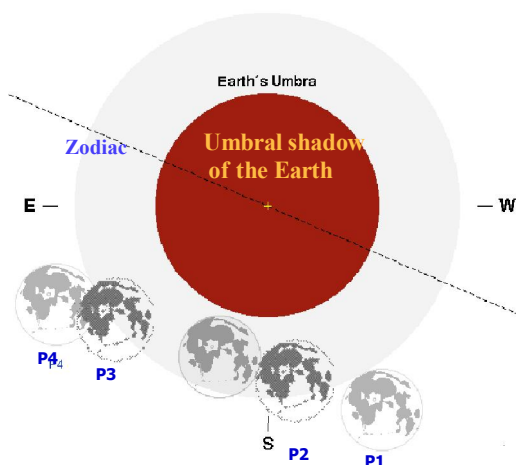

In the Šariĥa, the criterion which determines the obligation of the signs prayer is the observation with naked eye of the eclipse from the Earth's surface. The penumbral eclipse of the Moon becomes noticeable when penumbral shadow of the Earth cast onto the two-thirds of the full Moon and dims its surface.

The eclipse will begin at 19:55 KMT (P1) but it's only around 21:15 KMT that Penumbra will cover the two-thirds of the Moon's face (P2) causing the moon to darken and appear to change color on the southern half of the Moon.

At this moment, the signs prayer is obligatory. Before this, color change and darkening of the Moon are not perceptible.

The total eclipse will reach its maximum at 21:55 KMT and until approximately 22:35 KMT, two-thirds of the moon are in darkness (P3).

After this point, the color change of the Moon will no longer be visible. So, according to the Šariĥa, it will be the end of the eclipse and the end of the obligation of signs prayer despite that, in fact, the eclipse, as an astronomical event, will continue until 23:54 KMT (P4).

About the areas of visibility of the penumbral eclipse:

About the map of the eclipse path:

The grey-shaded areas are the zones where the penumbral eclipse will happen.

In the other areas, the eclipse will not be visible.

The center of the eclipse will happen in the Indian Ocean.

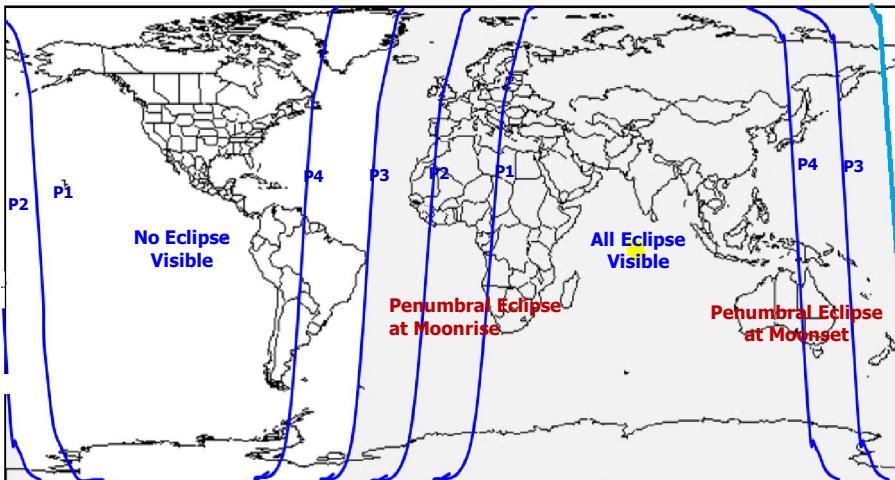

Observation areas of all the phases of the penumbral eclipse:

In grey-shaded areas located between P3, in Asia and P2, in Eastern Africa, the penumbral eclipse will be observed after moonrise and the eclipse will end before moonset. In this area the penumbral eclipse will be the longer.

Observation areas of some phases of the penumbral eclipse:

In areas located between P2 and P3 in the African continent and the ocean, for the beginning of the penumbral eclipse, the observation of the eclipse will not be impossible given that the eclipse will occur before moonrise

but areas where the beginning of the eclipse will coincide with moonrise, the beginning of the eclipse will be visible. In areas located between P3 and P2 in Pacific Ocean, the end of the penumbral eclipse of the Moon will happen after moonset, but in areas where the end of the eclipse will coincide with Moonset, the end eclipse will be visible.

Perform signs prayer

According to calculation, it is possible to determine the moment of the penumbral eclipse when the Moon will begin to change color, but in all cases, the criterion which determines the obligation of signs prayer is the observation; that is to say, from the beginning of the penumbral eclipse until the mid eclipse, it should be possible to see that the Moon has changed of color and became darker. In this case, the signs prayer is obligatory.

The beginning of the time of signs prayer is the beginning of the eclipse. It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse. The time of signs prayer terminates with the end of the eclipse.

In the table below those times have been listed. The obligation of signs prayer is starting with the beginning of the eclipse. In the table, the hours of the beginning of the eclipse have been mentioned in the first column. As, it is not appropriate to delay the signs prayer after the middle of the eclipse (when the eclipse reaches its full development), the hours of the mid-eclipse have been mentioned in the second column. In this column, when no hour has been mentioned, it means that in this city, the eclipse will happen after the second half of the eclipse: in those areas, the signs prayer must be immediately performed, without delay in any case.

The hours of the end of the eclipse have been listed in the last column: the hours mentioned in this column are also the hours of the end of the obligation of the signs prayer.

The seventh day of the month of Šafar
the martyrdom of Ĥādrat Ēmām Ĥasan Moĵtabā عليه السلام

View of the Sanctuary of the martyrs of Šeffin battle

The eighteenth day of Šafar is the commemoration of the martyrs of the Šeffin battle. Ĥādrat Mawlā himself made the funeral prayer and buried them himself (Ēamār, Oweys, Ĥazīmeĥ, Abol Heyĉam and ...). This place is also the qadamgah and mošallā of Ĥādrat Mawlā, Ĥādrat Ēmām Ĥasan Moĵtabā and Ĥādrat Ēmām Ĥosayn. The importance of this place is so remarkable that it is worthy recommended to go there for ziyārat and spending a few days near the martyrs. Allāh grants this success to all believers.

A shrine has been built in Ar-Raqqah in Syria. This shrine is the result the efforts of Ayatollāh Fehrī. But recently it has been destroyed by the Nāsebīs

يا مولاتي يا فاطمة الزهراء أعيشيني

Yā Mawlāti Yā Fātēmah Zahrā Aḡiçini

View of Rawdato-Nnabi and the main door of the house of ḥāzrat Mawlā and Fātēmah through which Gabriel didn't enter without permission. When ḥāzrat Moḥammad wanted to enter in this house, he laid his two hands on the both sides of the door and with a loud voice so that the people of the mosque hear, he recited the verse of the holy Qoran about the virtues of the Ahlol-Bayt and said salam to them and if he didn't hear answer, he turned and went away. This same door has been broken and burned and three people were done martyrs. The Muslims (with the exception of a few persons) watch this drama without saying anything. (In the left side of the picture; the door of the houde of Fātēmah. To hide it, the Wahhabis have put some shelves on doorstep and they have eliminated the inscription that was above the door).

Penumbral lunar eclipse

14th Jomādāal-ōlā 1438

Date of the eclipse: Saturday 14th Jomādā al-ōlā 1438=23rd Bahman=23rd Aquarius 1395= 11th February 2017

Location:

This eclipse will be visible in America, Africa, Europe, Asia to China and Mongolia.

The February 11th eclipse is Member 59 of 71 of saros 114.

Penumbral magnitude: 0.9884.

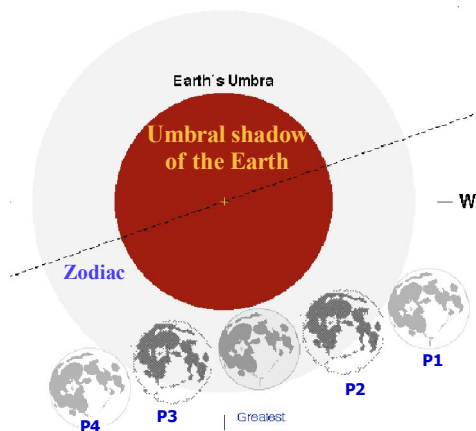

In the Šariĕa, the criterion which determines the obligation of the signs prayer is the observation with naked eye of the eclipse from the Earth's surface. The penumbral eclipse of the Moon becomes noticeable when penumbral shadow of the Earth cast onto the two-thirds of the full Moon and dims its surface.

The eclipse will begin at 01:34 KMT (P1) but it's only around 03:01 KMT that Penumbra will cover the two-thirds of the Moon's face (P2) causing the moon to darken and appear to change color on the southern half of the Moon.

At this moment, the signs prayer is obligatory. Before this, color change and darkening of the Moon are not perceptible.

The total eclipse will reach its maximum at 03:44 KMT and until approximately 04:27 KMT, two-thirds of the moon are in darkness (P3).

After this point, the color change of the Moon will no longer be visible. So, according the Šariĕa, it will be the end of the eclipse and the end of the obligation of signs prayer despite that, in fact, the eclipse, as an astronomical event, will continue until 05:54 KMT (P4).

About the areas of visibility of the penumbral eclipse:

About the map of the eclipse path:

The grey-shaded areas are the zones where the penumbral eclipse will happen.

In the other areas, the eclipse will not be visible.

The center of the eclipse will happen in the west of Africa.

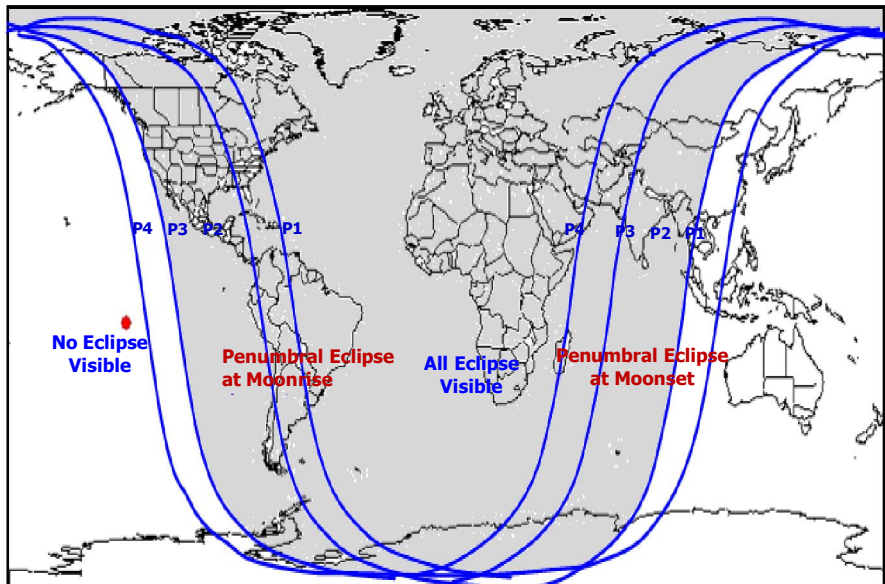

Observation areas of all the phases of the penumbral eclipse:

In grey-shaded areas located between P3, in Asia and P2, in America, the penumbral eclipse will be observed after moonrise and the eclipse will end before moonset. In this area the penumbral eclipse will be the longer.

Observation areas of some phases of the penumbral eclipse:

In areas located between P2 and P3 in the America, for the beginning of the penumbral eclipse, the observation of the eclipse will not be impossible given that the eclipse will occur before moonrise but areas where the beginning of the eclipse will coincide with moonrise, the beginning of the eclipse will be visible.

In areas located between P3 and P2 in Asia, the end of the penumbral eclipse of the Moon will happen after moonset, but in areas where the end of the eclipse will coincide with Moonset, the end of the eclipse will be visible.

Perform signs prayer

According to calculation, it is possible to determine the moment of the penumbral eclipse when the Moon will begin to change color, but in all cases, the criterion which determines the obligation of signs prayer is the observation; that is to say, from the beginning of the penumbral eclipse until the mid eclipse, it should be possible to see that the Moon has changed of color and became darker. In these case, the signs prayer is obligatory.

The beginning of the time of signs prayer is the beginning of the eclipse. It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse. The time of signs prayer terminates with the end of the eclipse.

In the table below those times have been listed. The obligation of signs prayer is starting with the beginning of the eclipse. In the table, the hours of the beginning of the eclipse have been mentioned in the first column. As, it is not appropriate to delay the signs prayer after the middle of the eclipse (when the eclipse reaches its full development), the hours of the mid-eclipse have been mentioned in the second column. In this column, when no hour has been mentioned, it means that in this city, the eclipse will happen after the second half of the eclipse: in those areas, the signs prayer must be immediately performed, without delay in any case. The hours of the end of the eclipse have been listed in the last column: the hours mentioned in this column are also the hours of the end of the signs prayer.

The annular Solar eclipse

29th of Ĵomādā al-ōlā 1438

Invisible in Makkah, Middle East and Iran

In those areas there is no signs prayer.

Date of the eclipse: According Mean Time KMT, Kaēbah – Makkah.

Sunday 29th Ĵomādā al-ōlā 1438 = 8th Pisces = 8th Esfand 1395 = 26th February 2017.

Location: The Pacific Ocean and South America (Chile to the southern half of Brazil), the Atlantic Ocean and the Antarctic, the southern half of Africa

Eclipse path:

The February 26th eclipse is Member 29 of 71 of saros 140. The eclipse will start from Atlantic Ocean in the west of South America at 15:10:47 KMT and will continue its path, crossing the Pacific Ocean and South America, South Pole, Atlantic Ocean and Africa, will end near the coast of East of Africa at 20:36:01 KMT. The maximum eclipse will occur at 17:53:24 KMT in the Atlantic Ocean with a magnitude of 0.9922.

About the map of the eclipse path:

The area determined by a pink line on the left side of the map, shows the area where the eclipse will begin.

The area determined by a pink line on the rightside of the map, shows the areas where the eclipse will end.

In the area determined by a pink line on the left side of the map, the solar eclipse will begin at the end of the night.

The area determined by a pink line, on the extreme left side of the map without blue line, designates the zone where the eclipse will be visible at sunrise. In this area, the eclipse will begin from the mid eclipse.

The area determined by a pink line on the left side of the map with blue lines, designates the mid eclipse and the phases of the eclipse after sunrise.

In the area determined by a pink line on the right side of the map, the night will begin before the end of the eclipse, so, the end phases of the eclipse will not be observed.

The area determined by a pink line on the extreme right side of the map with blue lines, designates the area of the mid eclipse and the phases after it, that will happen before sunset.

The area determined by a pink line on the right side of the map with blue lines, designates the mid eclipse and the phases after it, which will happen after sunset. In this area, it will be only in the late afternoon, before sunset, that the beginning of the eclipse will be visible. In this area, nor mid eclipse nor the end of the eclipse will not be observed.

Outside of this zone, in areas determined by blue lines, all the phases of the eclipse will be observed.

The red line shows the maximum eclipse zone with 30.6 kilometers wide.

Perform signs prayer

The beginning of the time of signs prayer is the beginning of the eclipse. It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse. The time of signs prayer terminates with the end of the eclipse.
